Cindy, and all Directors of YPM,

In the following is the itemized list of needs you requested that will help return YPM to the level that we were before the hurricanes (Emily and Wilma). Our American facilitating and enabling, of YPM ministry through Come and See Missions, in our Field Education and Medical programs can not resume, until we replace infrastructure(s) at the base of operations facility in Leona Vicario.

1. Electrical... Install permanent overhead power lines from Government Power Company transformer to base property with installation of second (private) transformer located securely in-between Government boundary and within YPM facility. (Please see attached Mexican Government bid)  
\$12,000.00US
2. Materials... Replace wind broken water storage tanks and windows, water warped wooden doors and begin stucco to water soaked concrete blocks to prevent further mold.  
\$5,000.00US
3. Transportation... Sell one damaged 1991 Ford mini-bus and 1998 Ford Expedition, purchase two semi-used 12 passenger 250 series 1-ton Vans.  
\$30,000.00US
4. Equipment... Replace looted construction lumber and tools inventory and on remaining other damaged 1991 Ford mini-bus replace broken windows and tires.  
\$3,000.00US

Asking, discussing and through prayer I present these items for immediate restoration. Please seek the means to continue the YPM ministry as guided by our Lord. Thank you.

Firmly remaining in His grip,  
Mark D. LaGree  
Yucatan Peninsula Mission  
Mission Officer
